

CAYUSE HUMAN ETHICS

**NEW IRB SUBMISSION
PROCESS COMING SOON**

WHY CAYUSE?

Cayuse Human Ethics provides transparency in all phases of the protocol life cycle. Cayuse is renowned for its increased efficiency for administrators, researchers, and community members to collaborate. Using Cayuse Human Ethics will not only reduce noncompliance risk, but accelerate review processes as well.

SMARTFORM LOGIC

When making a protocol submission, based on your responses, the subsequent required fields are catered to your specific needs. This will help minimize additional information or attachment requests so long as question prompts are followed.

EASE OF COLLABORATION

Students can now be listed as PIs for IRB submissions. With Smartform logic, once the PI identifies themselves as a student Cayuse will require a faculty member to be assigned to the project and sign off before IRB re-routing. Task assignment is another tool available, where users can assign specific tasks with due dates to themselves or their team members for project management

REAL TIME ASSISTANCE

Unsure how to answer a question? The Cayuse Admin has built in help test available with questions to provide definitions, suggestions, and links to additional resources. Having trouble with your submission? Even as you draft your IRB submission, the Cayuse Admin can see your progress in real time and provide support.

CITI Synced

As long as you are registered as a Stockton affiliate for your CITI training, all training certificates will automatically sync with your Cayuse profile. No need for manual uploads!

Submission Status

At any time you can see the status of your protocol being reviewed. Whether it's under pre-review with the IRB admin or is waiting to be assigned to an IRB member, you can see where your studies are.

Tracked Changes

Submitting a protocol modification? No need to summarize the changes, all changes are highlighted for reviewers to see. Has the IRB admin requested changes in their pre-review? Any revision requests are marked exactly where they need to be modified for ease of editing.
