

STOCKTON | CENTER FOR TEACHING
UNIVERSITY | & LEARNING DESIGN

STEP 1:

Define Student Learning Outcomes (SLOs). Click [here](#) to learn more about developing effective Student Learning Outcomes.

STEP 2:

Map Student Learning Outcomes to class learning & assignments or assessments. Click [here](#) to learn more about creating a course map for your course.

STEP 3:

Collect data and reflect on achievement of Student Learning Outcomes. Use your course map to review data collected during the course. How does the data inform your assessment of how well Student Learning Outcomes were achieved?

STEP 4:

Close the Loop. Reflect and report on your course findings. Share with your program and colleagues and make appropriate recommendations and adjustments to maintain or improve outcomes.
