Questions: 609-652-4699

This book presents an important critique, demonstrating for the first time how the five permanent member states in the United Nations Security Council (P-5) have exploited the Genocide Convention to isolate themselves from the reach of international law, marking them as "outlaw states" that act with impunity, including when committing genocidal violence. The book therefore urges students and scholars in Genocide Studies to remove the special status accorded in the field specifically to the United States, one of the P-5, in order to recognize clearly genocide in the US, past and present; act to prevent genocidal violence in the US; and work to hold perpetrators accountable. Dr. Bachman will respond to questions from the audience during the discussion.
