#	Answer	%	Count
1	Less than a four-year degree	53%	318
2	A four-year college degree or more	42%	257
3	Refuse	5%	31
	Total	100%	606

**D4 - Which of the following general categories best represents your household income last year before taxes:**

#	Answer	%	Count
1	Less than \$50,000	22%	132
2	\$50,000 to less than \$100,000	23%	137
3	\$100,000 or more	41%	248
4	Refuse	15%	88
	Total	100%	606

**Do you consider yourself to be a:**

#	Answer	%	Count
1	Democrat	31%	187
2	Republican	19%	112
3	Independent	28%	168
4	Something else	15%	91
5	Refuse	8%	48
	Total	100%	606

**Lastly, what is your gender?**

#	Answer	%	Count
1	Man	47%	286
2	Woman	49%	296
3	Identify another way/Refuse	4%	24
	Total	100%	606

## METHODOLOGY

The poll of New Jersey residents was sponsored and conducted by the Stockton Polling Institute of the William J. Hughes Center for Public Policy at Stockton University. Data collection took place from June 18-25, 2025. A total of 606 New Jersey voters were interviewed. Responses were recorded via telephone or online in English. Overall, 94% of interviews were conducted on cell phones and 6% on landline phones. In terms of mode, 66% were reached via dialing with the survey administered by a live interviewer and 34% were reached via text-to-web. The live calls were conducted by Opinion Services. The text messages were sent by Stockton Polling Institute staff from the University's Galloway campus and included a single-use link to take the survey online. All respondents passed various quality control checks to evaluate the quality of the data collected online. Both cell and landline samples consisted of random digit dialing (RDD) sample from MSG. Within-household selection is done by asking for the youngest adult. Adults without a telephone are excluded from the sample. The data was weighted to balance the sample demographics using iterative proportional fitting, also known as raking or random iterative method (RIM) weighting. Weights were based on U.S. Census Bureau ACS 2023 data for the adult population in New Jersey on variables of age, race, education level, and sex. The poll's margin of error is +/- 3.9 percentage points at a 95% confidence level. The margin of sampling error is higher for subsets. Sampling error does not account for other potential sources of bias in polls such as measurement error or non-response.
