## Congratulations Internal Award Recipients

### RPD MAIN ROUND FY20

Nathaniel Hancock, ARHU  
Jedediah Morfit, ARHU  
Katherine Panagakos, ARHU  
David Reiser, ARHU  
A. Edward Siecienski, ARHU  
Jongbok Yi, ARHU  
Jinchang Wang, BUSN  
Joseph Cirio, GENS  
Aleksandra Hultquist, GENS  
Larider Ruffin, HLTH  
Amee Shah, HLTH  
Cristina Cummings, NAMS  
Jessica Favorito, NAMS

Wooseok Ki, NAMS  
Michael Law, NAMS  
Craig Lind, NAMS  
John Manson, NAMS  
Erin Podlesny, NAMS  
Aaron Stoler, NAMS  
Joseph Trout, NAMS  
Judith Vogel, NAMS  
Claire Abernathy, SOBL  
Lauren Balasco, SOBL  
Susan Fahey, SOBL  
Malav Kanuga, SOBL  
Nazia Kazi, SOBL  
Jessica White, SOBL

## 19th Annual Day of Scholarship

Join us on Thursday, April 4th at 9am for the kick off with our Poster Presentations and breakfast for all!  
Check out the [GUIDE BOOK](#) for more information!

## United States Department of Justice (DOJ) Office of Justice Programs (OJP) National Institute of Justice (NIJ) Research on Immigration and Crime, FY 2019

**Deadline:** May 20, 2019

**Amount:** Upper \$3,000,000 - NIJ expects to make one or more awards with an estimated amount of \$3 million in FY2019. Successful applicants will be expected to complete the work proposed within a five-year period of performance.

### Abstract:

With this solicitation, NIJ seeks proposals for research projects that increase understanding of the relationship between immigration, both legal and illegal, and crime. Applicants should propose research projects that have clear implications for criminal justice policy and practice in the United States. NIJ encourages applicants to submit proposals for innovative approaches to advance the field's rigor and methodology in understanding the relationship between immigration and crime.

NIJ strongly encourages applicants to propose the most rigorous possible methods for isolating the effects of immigration status on criminality and offending and victimization and how those effects may vary based on subtypes of crimes and subtypes of offenders and victims. These may include the use of new and novel data sources or innovative analytic methods to examine existing data sets or data sources. Applications must describe in detail the sources of data that will be used in the project, the methodology, and analytic plan used to analyze the data, and the limitations of the proposed study. In particular, applications should address the challenges associated with collecting data from illegal residents and how their methodology will account for those challenges.

## Camille and Henry Dreyfus Foundation, Inc Jean Dreyfus Lectureship for Undergraduate Institutions

**Deadline:** May 17, 2019

**Amount:** \$18,500

THE CAMILLE & HENRY DREYFUS FOUNDATION

*Dedicated to the advancement  
of the chemical sciences*

### Abstract:

The awards provide a grant to bring a leading researcher to a primarily undergraduate institution to give at least two lectures in the chemical sciences. One of the lectures should be accessible and promoted to a wide audience that includes the general public. The remaining lecture(s) may be more technical. The lecturer is expected to spend more than one day at the institution to substantively interact with undergraduate students and a broad range of faculty over the period of the visit. Prior to August 2016, the program was known as the Jean Dreyfus Boissevain Lectureship for Undergraduate Institutions.

A portion of the award is to support two undergraduates in summer research. The undergraduates engaged in summer research are expected to work with mentors in contemporary chemistry.

### Abstract:

Applications are accepted from departments in the chemical sciences at primarily undergraduate institutions in the States, Districts, and Territories of the United States of America. Eligible departments grant a BS or MS degree in chemistry, but not a Ph.D. Institutions are restricted to only one application annually for this program. Institutions that receive an award are not eligible to re-apply for five years. Applications not funded in the year of submission will remain in contention for two additional years, though updated applications may be submitted during this period.
