Internal Award Online Application System

We hope everyone has been enjoying the ease of applying for internal award opportunities using the Online System. Please note that any application you may have started, but chose not to submit, can be deleted. Simply log in to the system using your GO Portal credentials. There you will see a list of all of your applications including funded, denied and in progress. If the deadline for the call has passed for an In Progress application, and you no longer need that particular information, you may simply click on the 'Delete Application' button to remove it from your list.

National Geographic Society
Exploration Grants

NATIONAL GEOGRAPHIC

Deadline: April 10, 2019 - Grant cycles run quarterly

Amount: **Upper $30,000USD Lower $10,000USD**
Exploration Grant projects last one year or less. Project start dates should be a minimum of six months after the submission deadline.

Abstract:
An Exploration Grant application is a request for funding by an experienced project leader in the areas of conservation, education, research, storytelling, and technology. The applicant and his or her team members are expected to demonstrate successful completion of similar projects with measurable and/or tangible results. If you have received a grant from National Geographic in the past, you may submit a new proposal after you have closed your previous grant record.

All proposed projects should be bold, innovative, and potentially transformative and have a primary focus in conservation, education, research, storytelling, or technology. Projects should also align to one of our three focus areas:

- Wildlife
- Human Journey
- Changing Planet

Eligibility:
All applicants must be at least 18 years old at the time they submit an application.

We encourage applications from around the world. If you are planning to work outside of your home country or community, you must include the name and contact information for at least one local collaborator as a project team member in the application.

As a result of changes in Chinese law effective January 1, 2017, the National Geographic Society is unable to support new grantee work in mainland China. This applies to any individual or organization proposing work in mainland China, regardless of citizenship. We will still accept applications from residents of Hong Kong, Taiwan, and Macau as long as the proposed work is outside of mainland China. The National Geographic Society continues to actively pursue registration with the Chinese government and will restart grant making once the registration process is complete.

You are prohibited from engaging in any grant-funded work with any individual or organization who is on the Specially Designated National (SDN) list maintained by the U.S. Treasury.
